CHAITHRA R

Python Full Stack Developer

chaithrapvg2003@gmail.com | 8431966397 | Bengaluru | /Chaithra123430 | /in/chaithrar11

SUMMARY

Python Full Stack Developer proficient in Python, Django, JavaScript, HTML, CSS, and MySQL. Skilled in developing responsive and database-driven web applications, implementing backend functionality, integrating APIs, and managing databases. Experienced in building full-stack projects and internships, with strong problem-solving, analytical thinking, communication, teamwork, leadership, and time management skills. Passionate about developing scalable, user-focused solutions and continuously improving technical expertise.

EDUCATION

Bachelor of Engineering, Sambhram Institute of Technology — Bangalore | 12/2022 – 06/2026
87%

12th, BGS Science Academy PU college — Chikkaballapura | 05/2020 – 05/2022
86.5%

10th, Jnana Bhodini School — Pavagada | 05/2019 – 06/2020
92.3%

SKILLS

Programming Languages — Python, JavaScript.

Framework — Django

Frontend — HTML5, CSS

Backend — Node.js

Databases — MySQL.

Core Concepts — OOP, Data Structures, REST APIs, CURD Operations, Authentication.

Tools — GitHub, Git, Power BI, VS Code.

INTERNSHIP

Android Development Using Generative AI | MindMatrix — Bangalore | 02/2026 – 05/2026

- Developed an Android application for community-driven waste management and environmental monitoring using Kotlin and Android Studio.
- Integrated Google Maps API, GPS, and REST APIs for location tracking, waste reporting, and location-based services.
- Implemented issue reporting and reward-based participation with a clean UI to improve community engagement and environmental awareness.

PROJECTS

Sign Language Translation — 05/2026 – 07/2026

Technologies: Next.js, React.js, Tailwind CSS, Python, MediaPipe, Genkit, Google Gemini AI, REST APIs

- Developed an AI-powered sign language translation application for real-time conversion of hand gestures into text and speech using MediaPipe and machine learning.
- Integrated Genkit with Google Gemini AI models for intelligent AI-driven processing and enhanced sign language translation capabilities.
- Built a responsive UI using Next.js, React.js, and Tailwind CSS, with REST API integration and customizable text-to-sign conversion.

Medify — 08/2026 – 08/2026

Technologies: Python, Django, HTML, CSS, JavaScript, MySQL, Git, GitHub

- Developed a Django-based healthcare and medicine management application with medicine search, data management, cart, and order processing.
- Integrated an AI-powered healthcare assistant to provide intelligent and interactive healthcare-related support.
- Built the application using Python, Django, HTML, CSS, JavaScript, and database integration, with Git/GitHub for version control.

Smart Parking Fee Calculator — 07/2026 – 07/2026

Technologies: HTML5, CSS3, JavaScript, Git

- Developed a responsive parking fee calculator that computes charges based on entry time, exit time, and vehicle type.
- Implemented JavaScript-based time calculations, fee computation, input validation, DOM manipulation, and event handling.
- Designed a clean, user-friendly interface using HTML5 and CSS3 with dynamic user interaction.
